EDUCATION

DigiPen Institute of Technology, Redmond, WA <i>Master of Science in Computer Science, Artificial Intelligence Specialization</i>	Expected Graduation: Summer/Fall 2027 <i>In Progress</i>
Tecnológico de Monterrey (ITESM) <i>Bachelor of Science in Computer Engineering</i>	Graduated June, 2023 GPA 94/100

WORK EXPERIENCE

Capgemini Back-End Developer	Mexico City, MX 2024 – 2026
Joined a cross-functional team integrating Blue, BBVA's AI assistant, into the bank's large-scale production banking systems.	
- Designed and shipped REST APIs and backend services connecting LLMs, frontend, and databases, ramping up independently on an unfamiliar, high-stakes codebase. - Partnered with frontend, data, and ML engineers through code review and Agile ceremonies to ship features that improved day-to-day workflows for employees and end users. - Authored technical documentation that shortened ramp-up time for new teammates	
Scale AI Internship Program	Remote 2022 – 2024
- Built TypeScript + Node.js services for large-scale web data collection and automation. - Redesigned core workflows for scalability and reliability, cutting processing errors and turnaround time. - Reviewed teammates' code and incorporated feedback on mine, building a habit of collaborative code review.	
NDS Cognitive Labs Internship Program	Mexico City, MX 2022
<u>JOURNAL PUBLICATION</u> - Built a ReactJS web app for dynamic document search, cutting users' time-to-information. - Integrated MongoDB and IBM Watson APIs to improve chatbot retraining and UX; work contributed to a co-authored journal publication.	

MAJOR PROJECTS

Personal Portfolio Website <u>WEBSITE</u>	2026
Building an interactive site (Next.js App Router, TypeScript, Tailwind CSS v4, shadcn/ui, Motion) featuring a professional work section and a digital illustration gallery, aimed at recruiters.	
Amazon Recorder System Helper <u>PRESENTATION</u>	2022
Built a ReactJS + Java application to record and analyze call center interactions for Amazon Connect. Deployed on AWS (S3, EC2, ECR, ECS) + Docker for a reliable cloud-based system.	
AI Project - Urban Mobility <u>GITHUB PROJECT</u>	2022
Designed a Unity-based multi-agent simulation with smart traffic lights and autonomous agents modeling intersection traffic, combining gaming and AI interests.	

SKILLS & INTERESTS

PROGRAMMING LANGUAGES Java, JavaScript, TypeScript, Python, C/C++, C#, SQL, NoSQL	FRAMEWORKS & TOOLS Spring Boot, ReactJS, React Native, Node.js, AWS (S3, EC2, ECS, ECR), GCP, MongoDB, Django, Unity, Git/GitHub, REST APIs, Google Apps Script, Large Language Models (LLM), Chatbot/Conversational AI Development, Dialogflow, IBM Watson, Machine Learning
INTERESTS Digital Illustration Game Development Martial Arts	CORE COMPETENCIES Code Review & API Design, Agile/Scrum Methodologies, Cross-Team Collaboration, Learning Unfamiliar Systems Independently, AI-Assisted Development, Modern Web Development with Cloud Services, Cross-Platform UX
